

## 29 Northeast Corner/East Meiners Upland Unit Spring 1999

We had the farmer (Bruce Scherger) spray herbicide on this corner in the Fall of 1998, when he did the rest of this upland that we are putting back into farm ground after it failed (volunteers think they planted some or all of it in 1993) Bruce had to spray it Fall '98 and Spring '99 four times before he planted to soybeans in spring 1999.

But the northeast corner we herbicided with \_\_\_\_\_ at least once in Spring of 1999 (two applications total?).

We then planted it with seed from Genesis Nursery (see lists in paper file under this planting or under Seed Bought) and little bluestem from Nachusa Grasslands.

We mowed about three times during the Summer of 1999.
