

Planting 34 – Field Cove Planting Hook Larson Prairie Unit – Spring 1999

In May of 1999, this tiny field was disked and then hand planted with a Genesis Nursery mix of forbs and grasses (such as side oats grama) as well as N.G. little bluestem. It was immediately raked in with a Gator harrow as it rained.

The planting was mowed at least once during the summer. There are some small side oats and little bluestem and black eyed Susan appearing, but not much else. This field is quite shaded by trees on all sides, thinnest trees on the north side.
