

Planting 46 – West Meiners Uplands 2 Planting – Spring 2001

This area was mowed in the Summer of 1999 and then sprayed a few weeks later with a broadleaf herbicide (_____). Later, in October, after a few frosts the area was sprayed twice with Round-up which seemed to kill the grass well. We sprayed again in 2000? Then again in 2001?

It was then planted in June? of 2001.

It was mowed July 27, 2001.

July 9, 2013: Looks like a keeper now. Keep after weeds and overseed when possible. BK
