

## Jay's 2010 Planting Effort

New Acres: 10.9

Herbs, sedges, non-dominant grasses: 577.50 lbs.

Lbs./acre: 52.98

Dominant Grass (Little Bluestem): 5lb./acre

Total Seed: 57.98 lbs./acre

Species: 135, more or less, probably a few more. Beautiful dainties (bluets, gentians, poppy mallows, wood sorrels, etc.) and listed species (Prairie Bush Clover, Hill's Thistle, etc.) I decided to overseed into my 2009 2.9 acre low competition planting, thinking that this was their best chance to prosper. This represents a subtle but distinct shift from our traditional modeling.

Overseed: 63.23 lbs.

Areas overseeded: 2009 planting, 2008 planting, north end of Gobbler Bottoms.

Total seed collection: 640.73 lbs.
